The European VSAT market: trends and developments
- Haines, P.
EUTELSAT, Paris, France
This paper appears in: VSAT's in Europe - the Talking is Over, IEE
Colloquium on
On page(s): 2/1 - 2/6
London, UK
1995
Number of Pages: 40
References Cited: 0
INSPEC Accession Number: 5005109

Abstract:
EUTELSAT recognised that for the telecommunications applications of
the eighties and nineties, a system offering direct user-to-user access
would be required. The EUTELSAT Satellite Multiservices System
(EUTELSAT SMS) was therefore developed to support a range of digital
telecommunications services, including point-to-point,
point-to-multipoint, and VSAT networks. more than 320 full-time SMS
networks are in operation, ranging from simple point-to-point links to
fully-interactive hubbed or meshed VSAT networks. Antenna sizes
range from 50 cm to more than 10 m, and data rates from 9.6 kbit/s
to more than 2 Mbit/s. Applications span a range of business sectors,
including videoconferencing, telephony, remote printing, financial data
distribution, computer-to-computer interconnection, and digital
video/audio distribution.

Index Terms:
European VSAT market telecommunications applications direct
user-to-user acces Satellite Multiservices System EUTELSAT SMS
